

## HEALTHCARE WEBINAR

# Challenges of AI in Healthcare

8 May 2025 | 7.00PM – 8.30PM (GMT +8)

Science and technology in healthcare has advanced rapidly including the use of Artificial Intelligence (AI). The use of AI is now a growing trend in healthcare delivery under different branding such as “Smart Health”, “Smart Hospital”, “E-health”, “Digital Health” etc. AI applications can be very broad and not only restricted to diagnosis and monitoring in patient care, but also used for system management in healthcare setting. AI has the potential in precision medicine and advanced patient self-management too.

Emerging healthcare technology will bring benefits to mankind but could also result in adverse outcomes if not managed well, like using a new drug or new diagnostic test. Ethical issues such as governance and regulation, data protection, as well as medico-legal issues such as liability and consent need to be well addressed. How would we balance the risks and benefits while managing the potential ethical and medico-legal issues?

This webinar will bring in experts experienced in healthcare law and ethics to discuss the regulation and governance of AI in healthcare, clinical liability of medical and health professionals in using AI in healthcare delivery, and use of AI in clinical reasoning.

**Date and time:** 8 May (Thursday), 7:00pm – 8:30pm (GMT +8)

**Dr David KAN**  
M.B.B.S., M.F.F.L.M.  
Solicitor Advocate, Howse Williams,  
Hong Kong

**Dr David KAN** is a dual qualified medical doctor/solicitor and is a Founding Member of the Faculty of Forensic and Legal Medicine of the Royal College of Physicians (UK). He "changed horses" to law almost 30 years ago and has specialised in healthcare law since.

Nowadays David and Chris Howse lead a team of healthcare lawyers, which is the largest team of its kind in HK, with extensive experience in defending clinical negligence claims.

As an experienced litigator, David has gained accreditation as a Solicitor Advocate with Higher Rights of Audience in Hong Kong's Court of First Instance, Court of Appeal and CFA. David has substantial advocacy experience before the Civil Courts, Coroner's Court, Medical and Dental Council and other professional tribunals. He appreciates the importance of getting involved in a case and managing the evidence and strategies from day 1.

David has a Master's Degree in Medical Law and Ethics which puts him on good stead in providing regulatory advice to healthcare institutions including hospitals, biotechnology companies, medical device manufacturers and specialist group practices. He has a special interest in advising on mental health law, medical criminal proceedings, clinical trials, and due diligence in corporate transactions.

In 2008, David was appointed as an Honorary Associate Professor by the Department of Pathology, Faculty of Medicine, The University of Hong Kong. He regularly lectures at the University as well as to the Specialist Colleges. He provides clients with training in clinical risk management.

David keeps up to date with clinical medicine, especially in general surgery. He has served on various governing boards including those of a government hospital and a major international school. He is a qualified coach with the Squash Rackets Association (UK) and he trains almost daily.
